[redacted]

Through my Foreign Missile and Space Analysis Center I have been kept aware of the progress of the 46 meter reflector mentioned in your letter of 21 October 1969. As promised earlier this year, assistance in training especially of junior staff, is available.

Messrs. [redacted] 25X1A
of the Foreign Missile and Space Analysis Center, will begin making arrangements to visit [redacted] 25X1C
If this visit cannot be accomplished before the end of the year, certainly it will be early in the new year. The purpose will be to discuss the entire project in as much detail as is desired. These discussions should result in a mutually suitable schedule of activities to meet your requirements.

25X1A [redacted] is concerned with the signals aspects of the intelligence problem and [redacted] represents 25X1A
the space program interest from a broad systems point of view. These representatives of my Foreign Missile and Space Analysis Center should be able to discuss most areas of particular interest to you, including the major problems of passive satellite reconnaissance.

The technical discussions held with [redacted] group in the fall of 1968 were quite beneficial. Appropriate personnel within my organization are now generally familiar with the 40 meter reflector. I believe that the additional meetings will reinforce their appreciation of the characteristics and capabilities of that system.

Sincerely,

25X1A

[redacted]
Director
